

## Itgovernance – Electricity inspector

Do you have technical knowledge of electricity? Are you passionate about technology? Curious about the latest changes in various technical areas? Then you are the person we're looking for!

As an inspector of electrical installations, you are on the road all day in your own region. You will perform inspections for both private individuals and professional customers (domestic or industrial environment).

Guaranteeing the safety of our customers is your priority. You will inform customers about this and make them aware of this.

Your agenda will be drawn up by your colleagues from the planning. You can plan and introduce your own customers in consultation with the person responsible for the planning.

In addition, you take care of the administrative matters regarding the inspection in our digital platform. This ensures that you do not have to complete any manual administrative tasks after the inspection.

- You have a Bachelor or A2 in electricity or are equivalent through experience.
- You have experience or knowledge of household or industrial electricity.
- You are in possession of a driving license B.
- Customer focus is an indispensable quality for this position.
- Safety is of paramount importance to you.
- You stay informed of the latest AREI legislation.
- You're a fluent Dutch speaker
- You will find yourself in a family working environment that attaches great importance to a good working atmosphere.
- That is why we regularly organize teambuildings, trips, ...
- Full-time job (you leave for your first customer between 7.30 am and 8.30 am).
- You can count on internal training and support from our internal coaches.
- In addition to an attractive salary package, you can count on extra legal benefits and a company car with fuel card.
- Immediate permanent contract.
